

PXP Devices

Models, Capabilities &
Use Cases

Device Types

01

Portable

A compact, battery-powered payment terminal that can be deployed in mobile or temporary locations, allowing for self-service transactions without fixed infrastructure. Ideal for events, food trucks, or temporary retail installations.

03

Countertop

A stationary terminal designed to sit on a checkout counter or desk. Ideal for businesses that conduct transactions from a fixed location, such as traditional retail stores.

02

Mobile

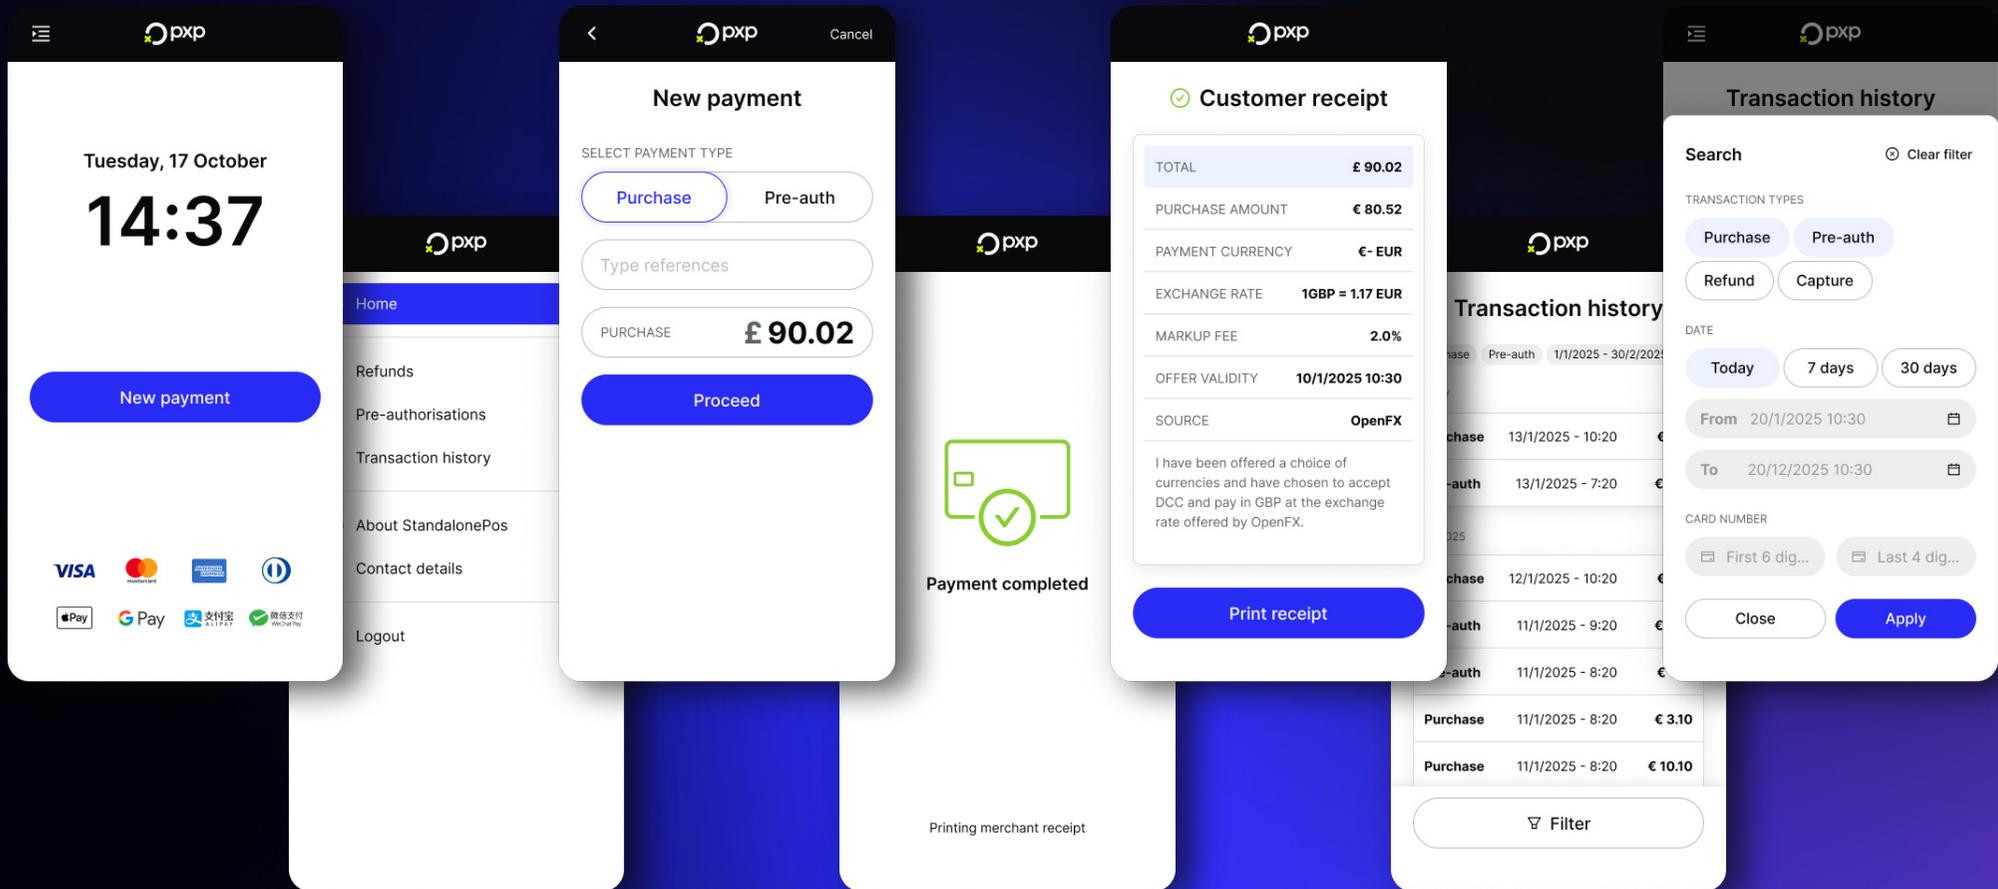

A flexible terminal to accept payments wherever your business takes you. Ideal for small merchants and mobile payment scenarios like taxis, delivery services, outdoor vendors, and more.

04

Unattended

A self-service payment terminal that allows customers to complete transactions independently, without the need for staff intervention. Ideal for vending machines, self-service kiosks, and automated fuel pumps.

Each device comes with **the PXP** application already installed.
